May 1, 1974 Proclaimed "Law Day U. S. A.".

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council presented the following proposed resolution:

WHEREAS, The Congress of the United States by resolution has designated the first day of May of each year as Law Day, U.S.A., to be "set aside as a special day of celebration by the American people in appreciation of their liberties and the reaffirmation of their loyalty to the United States of America; and of their rededication to the ideals of equality and justice under law in their relations with each other as well as with other nations and for the cultivation of that respect for law that is so vital to the democratic way of life"; and

WHEREAS, Today, more than ever before, each of us as individuals and all of us as Americans must recognize that law does not rule by itself, but to guard the rights, freedoms, opportunities and protection which it offers all citizens; we must abide by its constraints, and accept its responsibilities; and

WHEREAS, It is especially fitting, therefore that this year we should as citizens reaffirm our faith in the rule of law and in the supremacy of government by law rather than by men. The theme of this seventeenth annual observance of Law Day U.S.A. carries a timely message: "Young America, Lead the Way, Help Preserve Good Laws, Help Change Bad Laws, Help Make Better Laws". It reminds us only through adherence to the processes of law and representative government can our community and nation achieve the goals we seek in social betterment and progress; and

WHEREAS, The social and political problems which beset this nation, and the world, today may only be finally and justly resolved by means of the law; and

WHEREAS, Adherence to principles of law the resolution of individual social and national problems has distinguished this nation from other nations which unsuccessfully seek to solve these very same problems by physical force and violence; and

WHEREAS, Mankind's most practical hope for peace lies in the willingness of all men to work together to build an orderly world community under the rule of law; now, therefore,

Be It Resolved, That the Mayor and the City Council of the City of Chicago hereby proclaims their support of May 1, 1974 as Law Day, U.S.A., and hereby enjoin all men of good will to demonstrate the importance of the law by offering their support of Law Day, U.S.A.

The seconding aldermen all spoke with great feeling of the respect and admiration they had felt for the late Mr. Weisman. They praised him highly for his sensitivity, his involvement and mostly his great love for his community, and his City. It was noted that in line with Mr. Weisman's philosophy "together we can do great things", people were inspired to do great things. It was also noted that he was always optimistic and had a great sense of humor. Mr. Weisman also had the ability to inspire people, so much so that they were capable of achieving things beyond their capabilities, because of Mr. Weisman's trust and confidence.

Honorable Richard J. Daley, Mayor, addressed the Council, and expressed his thanks for the many, many acts of kindness, dedication and devotion to the people of Chicago. The roadway(s) of the several street(s) heretofore specified between the points herein described, also the roadway(s) of all intersecting alley(s) extended from the curb line to the street line on each side of said specified street(s) between the points herein described shall be so graded by cutting or filling and compacted by rolling with a roller of ten (10) tons weight that after the grading of the roadbed(s) is completed and the pavement herein described placed thereon, the surface of the finished pavement at the center of the roadway of each of said specified street(s) shall be at the elevation of the top of the curbing herein described; and the surface of the said finished pavement at the summits in the gutters between catchbasins and adjoining the roadway face of the curbing shall be three (3) inches below the top of said curbing, and at the catchbasin inlets in the gutters adjoining the roadway face of the curbing shall be nine (9) inches below the top of said curbing. The slope of the gutters adjoining the roadway face of said curbing shall be uniform from the summits to the catchbasin inlets.

A transverse section of the surface of the finished pavement and gutters shall be an arc of a circle passing through the said gutter elevations and the elevation of the center of said finished roadway at every part of the roadway of said specified street(s) between the points herein described.

In all intersecting alley(s) herein specified at the street lines of said specified street(s) the surface of the finished pavement adjoining the curbing shall be even with the top of the curbing and the surface of the finished pavement at the center of the roadways of said alley(s) shall be three (3) inches below the top of the curbing; and a transverse section of the surface of the finished pavement at the street lines of said specified street(s) shall be an arc of a circle passing through the surface of the pavement adjoining said curbing and the surface of the pavement at the center of said finished roadway(s). The surface of the said pavement thence shall slope gradually to meet the surface of the finished pavement at the curb lines of said specified street(s).

On the sub-grade as formed and compacted shall be spread an insulation course of limestone screenings. Said insulation course shall be one (1) inch in thickness and shall extend across the full width of the roadbed.

On the insulation course as formed and compacted shall be spread a foundation course consisting of a layer of crushed limestone of the best quality, broken so as to pass through a ring of four (4) inches internal diameter and held on a ring of two (2) inches internal diameter. The stone spread shall be well graded as to sizes. It shall be evenly distributed so as to leave no pockets filled with the small size stone. This layer shall be thoroughly rolled with a self propelled three wheel roller, weighing not less than ten (10) tons. The rolling shall begin at the edge of the pavement and the roller shall move parallel with the center line of the roadway. The roller shall progress gradually towards the center of the roadway, uniformly lapping each proceeding track, covering the entire surface with the rear wheels and continuing until the stone does not creep or move ahead of the roller. After the crushed limestone has been thoroughly rolled and keyed, limestone screenings shall be applied gradually over the surface and the rolling continued until sufficient screenings have been applied to completely fill the interstices. The screenings shall be swept in with hand brooms to properly fill the voids. The spreading and rolling shall continue until no more screenings will go in dry. No excess of screenings shall be used before applying water. Immediately after the voids have been filled with screenings, the macadam shall be sprinkled until saturated, the sprinkler being followed by a roller. More screenings shall be added if necessary. The sprinkling, sweeping and rolling shall continue until a grout shall be formed of the screening and water that will fill all voids, and form a wave of grout before the wheels of the roller. The quantity of screening and water necessary to fill the voids shall be determined by the engineer and shall be sufficient to produce a rough, granular surface. The rolling, at all times, shall begin at the sides, and then progress toward the center, thoroughly covering the entire surface with the rear wheels. When compacted, this layer shall measure not less than five (5) inches in thickness.

Upon the finished waterbound macadam base there shall be uniformly applied by an approved type of spreader box, two (2) inch stone to a depth providing a total base course thickness of three (3) inches after final compaction. After shaping to grade and rolling with a ten (10) ton roller three quarter (¾) inch stone chips shall be broadcast and broomed into the surface voids at the rate of fifteen (15) pounds per square yard. Liquid asphalt at a temperature of 140 degrees F. shall be uniformly applied by a pressure distributor at a rate of one and one-half (1½) gallons per square yard. Stone chips shall again be broadcast and broomed uniformly over the surface at the rate of fifteen (15) pounds per square yard. Liquid asphalt shall be uniformly applied by a pressure distributor at the rate of one-half (½) gallon per square yard. Stone chips shall be broadcast again at the rate of ten (10) pounds per square yard. The surface shall then be thoroughly rolled. The asphalt shall conform to the State Specification for Emulsified Asphalt R. S. 2, Page 640 of Illinois Standard Specifications for Road and Bridge Construction adopted January 2, 1952.

On the said foundation course shall be placed an asphaltic concrete surface course two (2) inches in thickness consisting of an asphaltic concrete mixture conforming to the standard requirements of the Illinois State Division of Highways for Type 1-11 Asphaltic Concrete adopted January 2, 1952, as follows: The asphaltic mix shall consist of a mineral aggregate bonded with the asphaltic cement. The asphaltic cement shall conform with the standard requirements of the Illinois State Division of Highways for Grade P.A. 6 Paving Asphalt, adopted January 2, 1952. It shall have a flash point (Cleveland open cup) 500 plus Fahrenheit. It shall have penetration at seventy-seven (77) degrees Fahrenheit of seventy-five (75) to eighty-five (85), and at least ninety-nine and five-tenths (99.5) per cent of bitumen shall be soluble in carbon disulphide.

When fifty (50) grams of said paving asphalt is heated in an uncovered tin box five and one-half (5½) centimeters in diameter and three and one-half (3½) centimeters in depth, and is held at a temperature of three hundred and twenty-five (325) degrees Fahrenheit for five (5) hours, then it shall have lost not over two (2) per cent by weight and the penetration of the residue thus obtained shall not be less than seventy (70) per cent of the penetration before such heating, said penetration being determined as herein described. Said paving asphalt shall have a ductility of not less than one hundred (100) centimeters being determined by elongating a briquette Dow form of said paving asphalt at uniform rate of five (5) centimeters per minute at a temperature of seventy-seven (77) degrees Fahrenheit.

The paving asphalt and mineral aggregate shall be mixed when heated between three hundred (300) and three hundred fifty (350) degrees Fahrenheit in an approved mixer to produce a homogenous mixture in which all particles of aggregate are coated uniformly. The heated mixture shall be delivered to the pavement in trucks with approved clean tight dump bodies. The temperature when delivered at the street shall be between two hundred fifty (250) and three hundred fifty (350) degrees Fahrenheit. Upon arrival the asphaltic mixture shall be spread upon the prepared base at a uniform depth and consistency so that the thickness when compacted as herein described will be two (2) inches.

Immediately after the asphalt surface course shall be spread it shall be connected thoroughly and uniformly with a three (3) wheel roller or a tandem roller. The asphalt paving mix shall be dumped first upon approved steel dump pans outside of the area on which it is to be spread. Immediately thereafter it shall be distributed into place with shovels

and spread with rakes in layers of uniform density and correct depth, unless a spreading machine is used. If a spreading machine is used it shall be of a type approved by the Board of Local Improvements. Immediately after the surface course mixture is placed it shall be compacted thoroughly with a three-wheel roller or a tandem roller. One (1) or more three-wheel rollers and one (1) or more tandem rollers will be required. The actual number of such rollers to be determined by the Engineer in accordance with the progress of the work. If the production of the asphalt plant delivered to the pavement exceeds seventy-five (75) tons per hour additional rollers shall be furnished as directed by said Engineer. After a final rolling the asphalt surface course shall at all points have a density of not less than ninety-five (95) per cent of the maximum possible density of a voidless pavement composed of the same materials in like proportions.

IV-2 POZZOLANIC BASE COURSE

On the subgrade as formed and compacted shall be placed and compacted to the depth shown on the plans and as herein provided.

(a) The pozzolanic base course shall be constructed in layers not more than six (6) inches (compacted) in thickness. When the thickness specified is more than six (6) inches the base course shall be construed in two (2) or more approximately equal layers. Each layer shall be deposited, full-lane width, directly on the prepared subgrade or on the preceeding layers of compacted mixture with a mechanical spreader box of a type approved by the Engineer. Where the base must be constructed in more than one layer, the previous layer shall be maintained in a moistened condition until the succeeding layer is placed. After having been tested for density and approved by the Engineer, the previous layer shall be raked to a depth of one (1) inch and dampened with water immediately prior to placing the succeeding layer so that the layers are in it together. The second layer must be placed the same way as the first layer. The Engineer of the Board of Local Improvements shall determine when the base course shall be constructed in one or more lifts. When placed, the pozzolanic mixture shall be free from segregation and shall require minimum blanding and manipulation. Immediately after placing the mixture shall be compacted with a pneumatic-tired roller, or with a vibratory compactor, or with a combination of the two. The base course, shall be given a final rolling with a three wheel or tandem roller. If the pozzolanic base is placed on gradual sub-base, the pozzolanic base shall be compacted to at least 100% of maximum density except that if more than one layer is required the first layer shall be compacted to 97% of maximum density and succeeding layers shall be compacted to 100% of maximum density.

(b) All pozzolanic mixture shall be placed and compacted the same day as it is mixed. The entire base course within the increment of work shall be completed within 24 hours.

Mixing operations shall be continued until all ingredients are distributed evenly throughout the mixture and a uniform mixture, free of segregation, is obtained. The engineer shall be the sole judge of the adequacy of mixing. The mixer shall be capable of discharging the mixture without undue segregation. The moisture content at the time of mixing shall be such that the moisture content at the time of compaction will be within 85 to 110 percent of the optimum moisture determined.

The Engineer may make such changes in proportions during the progress of the work as he may consider necessary.

(e) *Samples and Tests.*

A ½ gallon sample of the bituminous aggregate mixture for each 5000 tons produced, shall be taken by the Engineer for extraction tests. A minimum of three samples shall be submitted. The sample shall be a composite sample taken from at least five (5) trucks. A one (1) quart sample of the bituminous material being used shall be taken by the Engineer at the same time the bituminous aggregate mixture sample is taken. A. *Rental for Reserved Space.*

Commencing on the date hereof, and thereafter during the term of this Lease, Tenant shall pay to Landlord, as rental for Tenants' Reserved Space, its pro rata share of a monthly rental of One Hundred Fifty-eight and 21/100 Dollars ($158.21) computed on the basis of an even division of such rental among all Tenants and Airline Lessees to whom Tenants' Reserved Space is then being rented.

B. *Rental for Outbound Joint Space.*

Commencing on the date hereof, and thereafter during the term of this Lease, Tenant shall pay to Landlord, as rental for Airline Out-bound Joint Space, its pro rata share as determined solely by the Commissioner of Aviation and the City Comptroller of a monthly rental of Five Thousand Two Hundred Eighty Dollars ($5,280.00) computed as follows:

If a Terminal Use Charge per aircraft is in effect for such other aircraft operators, pursuant to City ordinance, in lieu of a Federal Inspection Area use charge per person, the total Federal Inspection Area reimbursement charge shall be reduced by that portion of each such use charge collected in the month second preceding the month of billing, which represents the average individual aircraft cost of using such Federal Inspection Area by aircraft of all Tenants and Airline Lessees during the previous Fiscal Year, but in no event shall more than the whole of any such charge be credited.

In the event that the Commissioner of Aviation agrees to allow aircraft operators other than Airline Lessees to use either Airline Outbound Joint Space or Airline Inbound Joint Space or both, and if at the time a Terminal Use Charge per aircraft is in effect for such other aircraft operators pursuant to City ordinance, the total International Terminal Adjustment Charge shall be reduced by that portion of each such use charge collected in the month second preceding the month of billing, which represents the average individual aircraft cost of using such joint space by aircraft of all Tenants and Airline Lessees during the previous Fiscal Year, but in no event shall more than the whole of any such charge be credited.

F. *Provisions Relating to Joint Charges.*

Tenant shall prepare the necessary passenger statistics required by the Commissioner of Aviation and City Comptroller, to compute the proration of joint space rentals and charges under this Section 3, which shall be reported monthly, as directed by the Commissioner of Aviation and City Comptroller, not later than the tenth day of the month following the month for which the statistics are prepared, which is the second month preceding the month for which billing is rendered, e.g., June statistics are the basis for August joint space billings. Landlord shall then prepare and submit to Tenant and the other Tenants and Airline Lessees involved, monthly invoices for the following month's charges, setting forth their respective pro rata share of such rentals and charges.

Considering the calendar month which includes the date hereof as the first month, the eighty percent (80%) share of Airline Joint Charges referred to in each of Sub-Sections B, C, D, and E of Section 3 shall be computed for the third month by giving double weight to such Tenant's passenger statistics of the first month, and shall be computed for the fourth month by giving double weight to such Tenant's passenger statistics of the second month.

Tenant shall be responsible only for the payment of the amounts prorated and billed to it in accordance with the provisions of Sub-Sections B, C, D, and E of Section 3 and shall not be responsible for any part of amounts prorated and billed to any other Airline Lessee.

In the event the Lease of any other Tenant or Airline Lessee leasing space or paying charges in common with Tenant pursuant of Sub-Section B, C, D, and E of Section 3 shall be terminated and such other Tenant or Airline Lessee is no longer using such space, the total monthly rental therefor shall

be prorated, effective as of the first day of the next succeeding calendar month, among the other Tenants and Airline Lessees obligated to pay a pro rata share of the said rental.

The proration formulas set forth in Sub-Section B, C, D, and E, of Section 3 may be revised from time to time at the sole discretion of the Commissioner of Aviation.

G. *Payment of Terminal Facilities Rental and Charges.*

Tenant shall pay to Landlord at the office of City Comptroller on or before the first calendar day of each month for which such rental and charges are payable (a) all rental payable for Tenant's Reserved Space in accordance with Sub-Section A, and (b) Tenant's pro rata share of Airline Outbound Joint Space Rental, Airline Inbound Joint Space Rental, Federal Inspection Area Reimbursement Charge, and International Terminal Adjustment Charge in accordance with the provisions of Sub-Section B, C, D, and E, respectively. Rental and charges for Tenant's Reserved Space for a period less than a full calendar month shall be prorated on a daily basis. Said payment is to be computed on landing fees, but not parking fees, then in effect as outlined in Chapter 37 of the Municipal Code of the City of Chicago.

Tenant agrees that it shall keep and maintain records of all landings made at Chicago-O'Hare International Airport, Chicago Midway Airport and Merrill C. Meigs Field, in form as approved by the Comptroller, and shall remit directly to Comptroller, with itemized report of landings, copy of which shall go to the Commissioner on or before the 15th day of the month following, payment for all such landings made during the preceding month, or portion thereof.

Landing fees shall not be assessed for any landing of a ferry flight between Chicago-O'Hare International Airport and the other City owned Airports, or for any landing of an aircraft returning to the airport from which it took off because of meteorological conditions, mechanical or operating causes, or any similar emergency or precautionary reason.

Since Chicago-O'Hare International Airport landing fee is subject to change every calendar half-year, the Commissioner shall advise Tenant of the specific fee to be in effect at Chicago-O'Hare International Airport for each such period, at least fifteen (15) days in advance of such period.

4. *Construction, Maintenance and Repair by Tenant.*

Tenant may construct or install at its own expense, any equipment, improvements and facilities, and any additions thereto, in all or any part of Tenant's Reserved Space, Airline Outbound Joint Space, and Airline Inbound Joint Space. OFFICE OF THE MAYOR

CHICAGO, May 6, 1974.

LADIES AND GENTLEMEN—I transmit herewith an ordinance which completely revises and updates the fire protection provisions of the Municipal Code by incorporating therein the latest in fire safety technology, by adopting nationally recognized standards and by rearranging the diverse provisions of the Code into Chapters by generic subject.

The new Fire Prevention Code provides stringent requirements relating to licensing, inspection, identification, capacity and content of tanks containing hazardous substances. It further establishes strict requirements regarding location of tanks, their connections, covering and diking. As additional safety precautions, the ordinance requires the posting of venting methods and other appropriate measures to be taken in the event of leakage or damage to tanks, as well as providing for the availability of protective clothing to be used in working in or near any escaping substance.

This extensive restructuring of the Fire Prevention Code is the product of months of review, study and debate by the staffs of the Fire and Building Departments in cooperation with the National Loss Control Service Corporation which was retained as consultant for this major undertaking.

Your favorable consideration of this ordinance is requested.

Very truly yours,
(Signed) RICHARD J. DALEY,
Mayor.

WHEREAS, Almighty God in His Infinite Wisdom has called to her eternal reward on April 30, 1974, Lillian Piotrowski, member of the Cook County Board and 22nd Ward Democratic Committeewoman; and

WHEREAS, Lillian Piotrowski was born and raised in Chicago. After attending Harrison High School, she earned a bachelor's degree in philosophy from Loyola University; and

WHEREAS, Lillian Piotrowski has served the citizens of the City of Chicago for many years. She worked as an adult probation officer in the Criminal Court, a Juvenile Court probation officer, a deputy sheriff and a truant officer for the Chicago Board of Education. In 1950, she was elected to the legislature and served for fourteen years as state representative from the 30th District. In 1964 she was elected to fill a two-year vacancy on the County Board. She was re-elected to that position in 1966 and 1970 and was a candidate for re-election this year. In 1969 she became the first woman in Chicago history to become a Democratic Ward Committeewoman; and

WHEREAS, Lillian Piotrowski was truly representative of the people she served, living in the same neighborhood all her life, giving constant support to many local charitable and civic organizations and devoting many long hours to the solution of community problems; now, therefore,

Be It Resolved, That the Mayor and the members of the City Council of the City of Chicago, in meeting assembled this 8th day of May, A.D. 1974, express their deep sorrow at the passing of Lillian Piotrowski, and further express their sympathy to her family; and

Alderman Stemberk moved to *Suspend the Rules Temporarily* to permit immediate consideration of and action upon the foregoing proposed resolution. The motion *Prevailed.*

On motion of Alderman Stemberk (seconded by Aldermen Pucinski, Bilandic, Simon, Laurino, Madrzyk, Burke, Natarus, Keane and Frost) the foregoing proposed resolution was *Adopted,* unanimously, by a rising vote.

The seconding Aldermen spoke admiringly about the life and style of the late Commissioner. One of the characteristics noted by all was her unfailing display of enthusiasm, and that she had been the embodiment of that virtue. She was also cited for having displayed the virtue of charity and love of her fellow man. It was also noted that while she had been well educated, with a number of degrees, she had never flaunted her education, but had remained a humble, simple person throughout her life. It was divulged that she had been an outstanding soft-ball player—in an era when women athletes were comparatively unknown. All agreed that she had been an outstanding speaker, one who could charm and stir an audience. She was saluted for her loyalty to her country, her City and for uncompromising loyalty to Mayor Daley. All extended their profound condolences to the members of the late Commissioner's family.

Tribute Paid to Late Charles A. Coleman.

Honorable Richard J. Daley, Mayor, on behalf of himself and the other members of the City Council submitted the following proposed resolution:

WHEREAS, Almighty God in His Infinite Wisdom has called to his eternal reward on May 2, 1974, Charles A. Coleman, a member of the Board of Election Commissioners; and

WHEREAS, Charles A. Coleman was born and raised in Chicago. He attended the Chicago Public Schools; Roosevelt University, and Chicago Kent College of Law. Mr. Coleman served in the United States Army, and received an Honorable Discharge; and

WHEREAS, Charles A. Coleman became the first black member of the Board of Election Commissioners in July, 1973. This three-member board supervises election machinery and vote counting in Chicago and the suburbs of Berwyn, Lyons, and Stickney; and

WHEREAS, Charles A. Coleman was long active in the social, civic and political affairs of the City, the County, and the State. Mr. Coleman was a former member of the Catholic School Board having been appointed in 1968 by John Cardinal Cody. At this time he was employed as an attorney and auditor for the Illinois Department of Revenue. In 1973, Mr. Coleman was an Assistant to Secretary of State, Michael J. Howlett, Acting as Head of the Commercial Division and Chief Legal Officer. Mr. Coleman was elected a delegate to the Illinois Constitutional Convention and served as Vice-Chairman of the Executive Committee; and

WHEREAS, Charles A. Coleman, served the people of Chicago with personal and professional integrity, loyalty and dedication. His passing will be mourned by his many friends, neighbors and colleagues; now, therefore,

Be It Resolved, That the Mayor and members of the City Council of the City of Chicago, in meeting assembled this 8th day of May, A.D. 1974, express their deep sorrow at the passing of Charles A. Coleman, and their deep appreciation for his dedicated and untiring service for the benefit of the people of Chicago and further express their sympathy to his wife, Gwendolyn; and

Be It Further Resolved, That a suitable copy of this Resolution be presented to Gwendolyn Coleman, widow of Charles A. Coleman.

Alderman Stewart moved to *Suspend the Rules Temporarily* to permit immediate consideration of and action upon the foregoing proposed resolution. The motion *Prevailed.*

On motion of Alderman Stewart (seconded by Aldermen Sawyer, Natarus and Frost) the foregoing proposed resolution was *Adopted,* unanimously, by a rising vote.

The aldermen all expressed their sorrow at the untimely death of Mr. Coleman and noted that he had been an outstanding example of self-improvement, that he had literally pulled himself up by his own boot straps, that he had gone to night school to become an attorney, that while an unsuccessful candidate for County Commissioner, he had served with ability as a delegate to the Constitutional Convention and had served with equal ability as a member of the Board of Election Commissioners. It was also noted that he had a rich and subtle sense of humor, capable of telling the most amusing stories. All noted that he had made an invaluable contribution to his community and to his City. All extended their sympathy to the members of his family.

Chapter 17 of the Municipal Code of Chicago is amended in Article II, Sections 17-2.3, 17-2.4, 17-2.5, 17-2.6, 17-2.10, 17-2.12, 17-2.25, 17-2.28, 17-2.35, 17-2.39, 17-2.40, 17-2.41, 17-2.42, 17-2.43 and 17-2.52 by deleting the words and figures contained in brackets below and inserting the following new words and figures, in Italics below:

17-2.3(a) It shall be unlawful within the City of Chicago, and within one mile of the corporate limits thereof, for any person, owner, agent, operator, firm or corporation to permit, to cause, suffer or allow the emission of any smoke from any source whatever of a density, shade or opacity [equal to or] greater than that described as No. [2] *1 1/2* on the Ringelmann Chart, as published by the United States Bureau of Mines, provided that the following exceptions to the provision of this Section shall be permitted for fuel burning, combustion or process equipment:

(1) For a period or periods aggregating 4 minutes in any 30 minutes of a density, shade or opacity equal to but not greater than that described as No. 2 on the Ringelmann Chart. *Except emissions of water and water vapor shall not apply to emissions under this provision.*

(2) For a period or periods aggregating 4 minutes in any 60 minutes of a density, shade or opacity equal to but not greater than that described as No. [2] *3* on the Ringelmann Chart when building a new fire [.], *banking fires, and soot blowing.*

[(b)] It shall be unlawful within the City of Chicago, and within one mile of the corporate limits thereof, for any person, owner, agent, operator, firm or corporation to permit, to cause, suffer or allow the emission of any smoke from any source whatever of a density, shade or opacity equal to or greater than that described as No. 1 on the Ringelmann Chart for fuel-burning, combustion, or process equipment the plans for which are less than 50% completed by July 1, 1970.]

(1) By qualified certified smoke reader through visual observation.

(2) By the use of a calibrated smoke evaluation device approved by the commissioner.

(3) By the use of a smoke monitor located in the stack with recording devices attachment approved by the commissioner.

(c) The commissioner may require any person, owner, agent, operator, firm or corporation whom he believes to be in violation of this Section 17-2.3 to provide a smoke monitor which shall be installed in such a manner that it will continuously monitor the density of smoke emission from the stack in question. Measurements of the smoke monitor shall be automatically transmitted to a recording device capable of maintaining a record of the data, which shall be made available to the commissioner upon request.

17-2.4. Subject to the provisions of Section 17-2.5, it shall be unlawful within the City of Chicago and within one mile of the corporate limits thereof for any person owning or in charge of any fuel-burning, combustion or process equipment device, or any portable boiler, to cause, suffer or allow the emission from any such source of any particulate matter except in conformity with the limits set forth below, as follows:

(1) The limitation for all *new* industrial particulate emissions shall be 0.10 grains per standard cubic foot, with the exception of indirect heat exchanger emissions and incinerator emissions, *on industrial processes up to 100,000 pounds per hour, 0.05 grains per standard cubic foot on industrial processes from over 100,000 pounds to 500,000 pounds per hour, 0.03 grains per standard cubc foot from 500,000 to 750,000 pounds per hour, and 0.02 grains per standard cubic foot from over 750,000 pounds to 1,000,000 pounds per hour. All emission limitations shall be from a stack, with the exception of indirect heat exchanger emissions and incinerator emissions. Calculation of allowable emissions for new industrial process rates up to 450 tons per hour shall be accomplished by the use of the equation* $E = 2.54\ (P)\ exp\ 0.534$ *where* $E =$ *rate of emissions in pounds per hour and* $P =$ *process weight rate in tons per hour. Calculation of allowable emissions for industrial process rates greater than 450 tons per hour shall be accomplished by use of the equation* $E = 24.8(P)\ exp\ 0.16$.

The limitation for all existing industrial particulate emissions shall be 0.10 grains per standard cubic foot, with the exception of indirect heat exchanger emissions and incinerator emissions, on industrial processes up to 100,000 pounds per hour, 0.05 grains per standard cubic foot on industrial processes from over 100,000 pounds to 500,000 pounds per hour, 0.03 grains per standard cubic foot from 500,000 to 750,000 pounds per hour, and 0.02 grains per standard cubic foot from over 750,000 pounds to 1,000,000 pounds per hour. All emission limitations shall be from a stack, with the exception of indirect heat exchanger emissions and incinerator emissions. Calculation of the allowable emissions for existing industrial process rates up to 30 tons per hour shall be accomplished by use of the equation $E = 4.10(P)\ exp\ 0.67$ *where* $E =$ *rate of emissions in pounds per hour and* $P =$ *process weight rate in tons per hour. Calculation of allowable emissions for existing industrial process rates greater than 30 tons per hour shall be accomplished by use of the equation* $E = [55.0(P)\ exp\ 0.11] - 40.0$.

Where the nature of any process or operation or the design of any equipment is such as to permit more than one interpretation of this regulation, the interpretation that results in the minimum value for allowable emission shall apply. Compliance test shall be performed and assumed at the cost to the owners. Exception:—Sinter Processes. No person shall cause or allow the emission of particulate matter into the atmosphere from the main windbox of any sinter process to exceed 1.2 times the allowable emission rate for new industrial processes. For the breaker stack, the emissions shall not exceed the allowable emissions for new processes.

(2) The emissions from indirect heat exchangers shall be limited as follows:

For equipment over 288,000 and under 10 million BTU's per hour input, the dust emissions shall be limited to 0.5 pounds per million BTU's input. If the capacity rating of the fuel-burning equipment is more than 10 million BTU's per hour input, the amounts of particulate matter which may be emitted for each million BTU input shall decrease as the capacity rating of the fuel-burning equipment increases as follows:

(a) No more than .50 pounds for each million BTU's input from equipment having a capacity rating of 10 million;

(b) No more than .39 pounds for each million BTU's input from equipment having a capacity rating of 50 million;

(c) No more than .34 pounds for each million BTU's input from equipment having a capacity rating of 100 million;

(d) No more than .23 pounds per each million BTU's input from equipment having a capacity rating of 1,000 million;

(e) No more than .18 pounds for each million BTU's input from equipment having a capacity rating of 5,000 million.

The amount of particulate matter which may be emitted from fuel-burning equipment having an intermediate capacity rating shall be determined by linear interpolation when plotted on Log-Log Graph Paper.

If two or more fuel-burning units are connected to a single flue, the total capacity rating of all fuel-burning units connected to the flue shall be the capacity rating for the purpose of computing the amount of particulate matter which may be emitted. If a single fuel-burning unit is manifolded to two or more flues, the capacity rating of the single fuel-burning unit shall be the capacity rating for the purpose of computing the amount of particulate matter which may be emitted. [The foregoing requirements shall be measured by the methods of the American Society of Mechanical Engineers (ASME), Power Test Code 27-1957 (PTC27-1957), Determining Dust Concentration in a Gas Stream, which is hereby made a part of this chapter by reference, or in acordance with modified procedures mutually agreed upon by the Commissioner and such person. A copy of the said Code shall be kept on file in the office of the Department subject to examination by interested persons.] *However, effective May 30, 1975, no person shall cause or allow the emission of particulate matter into the atmosphere from any new or existing fuel combustion source using solid and/or liquid fuel, to exceed 0.1 pounds of particulate matter per million BTU's of actual heat input in any one hour period.*

(3) A specified volume ratio, or other suitable index, or particulate bearing gas shall be established in accordance with Section 17-1.11, subparagraph (11) for various pieces, types or classes of fuel-burning, combustion or process equipment or devices, which constitute potential sources of emission of particulate matter; provided, however, that with respect to coal burning combustion equipment the basic limitations set forth in subparagraph (1) of this section shall be adjusted to a gas volume based upon 50% excess air.

(4) All existing combustion equipment shall meet the limitations of this section on and after

June 29, 1970, and all new equipment shall meet the limitations upon installation.

(5) All existing process and control equipment shall meet the limitations set forth in subparagraph (1) of this section on and after June 29, 1969, and all new equipment shall meet the limits upon installation.

(6) Emissions of particulate matter from all fuel-burning combustion or process equipment or devices shall not exceed emissions which would result from operations in accordance with limitations set forth in this chapter.

(7) The basic limitation on the average emission into the atmosphere of particulate matter from an incinerator shall be 0.20 grains per cubic foot of gas at standard conditions. These calculations are to be made at 50 per cent excess air and are to be the result of tests conducted in the field under field conditions, costs of which shall be assumed by the owners if emissions exceed allowable limits. All existing incinerators shall meet the limitations set forth in this paragraph on and after January 1, 1971, and all new equipment shall meet the limitations upon installation.

(8) The emissions, other than water vapor, from any sources that are liable to generate or evolve into particulate form through phase change or other transformation shall be deemed to be particulate matter at the emitted point.

(9) Particulate emissions from stationary emission sources subject to Section 17-2.4 shall be determined by the procedures described in Federal Register Volume 36, No. 247, Part II, December, 1971, except as modified as follows:

(a) Sample caught in impinger portion of train shall not be considered as emitted particulate.

(10) No demolition of a structure shall be initiated unless all safeguards necessary and practicable to minimize the emission of airborne dust and asbestos are taken.

(a) Notice of intention to demolish shall be made to the Department of Environmental Control ten days prior to the commencement of demolition. Such notice shall include the following information: name of owner or wrecker; address of owner or wrecker; description of the building, structure, facility or installation; scheduled starting and completion dates of demolition; method of demolition to be employed; procedures to be employed to meet the requirements of these regulations; and extent of asbestos materials described in 10(b).

(b) Boilers, pipes and steel members insulated or fireproofed with asbestos containing material shall be adequately wetted and stripped before any demolition or toppling is begun. This procedure shall be followed as to all other asbestos-coated surfaces. Such asbestos waste shall be immediately bagged and provision made for disposal at a sanitary landfill.

(c) Adequate wetting to suppress the dust shall be employed before and during the demolition or toppling of any section or wall of the structure.

(d) Partial demolition is permitted without complete stripping of asbestos materials from the entire structure, provided the provisions of 10(a), 10(b), and 10(c) are observed for the section to be demolished.

(e) Debris shall be transported through dust-tight chutes or in buckets and shall not be dropped or thrown from any floor. Any debris in chutes or buckets shall be sufficiently wetted to preclude dust dispersion at the point of discharge.

(f) All debris shall be thoroughly wetted before loading into trucks, vehicles or other containers. During transport, such waste shall be enclosed or covered so as to prevent dust dispersion.

(g) Dust and debris from the demolition operations shall be removed daily from adjacent streets, sidewalks, and alleys.

(h) Materials which contain asbestos physically bound to the parent material in such a manner that there will be no emission of airborne dust are exempt from the provisions of this section. Examples of such materials are wall and ceiling tile, shingles, and caulking materials.

(11) Any wrecker of a demolition operation who intends to demolish a building, structure, facility, or installation to which the provisions of Section 17-2.4(10)(a) would be applicable, but which has been declared by proper State or local authority to be structurally unsound, and which is in danger of imminent collapse, is exempt from the requirements of this paragraph, other than the handling of debris as specified in 10(g) and 10(h).

17-2.5. The following provisions shall be applicable to the processes and equipment hereinafter set forth in lieu of the limits upon the emission of smoke and particulate matter contained in Sections 17-2.3 and 17-2.4 hereof:

(b) When building the original fires at the start of seasonal operations, or under emergency conditions when it is necessary to operate a boat with a fluctuating load upon the boilers to prevent danger to life or property, the foregoing restrictions on emissions shall not apply.

(c) When a steamship or other vessel is in service, except as provided to cover particular conditions stated in this section, the provisions of Section 17-2.3 hereof shall apply.

The following provisions shall be applicable to all processes and equipment in addition to the limits upon the emission of smoke and particulate matter contained in Sections 17-2.3 and 17-2.4 hereof:

Provided, however, that maintenance, or repairs or alterations which are minor in scope or do not change the capacity of such fuel-burning, *refuse-burning, compactor,* combustion or process equipment or device and which do not involve any change in the method of combustion or materially affect the emission of smoke, dust, fumes or other products of combustion therefrom, may be made without an installation permit; provided further, that an emergency repair may be made prior to the application for, and the issuance of, a required installation permit in the event an emergency arises and

serious consequences would result if the repair were to be deferred. When such repair is made in emergency, application for an installation permit or operating permit therefor shall be filed in duplicate by the person or his agent in the office of the commissioner within a reasonable time after the start of such work. Each installation permit shall be posted in a conspicuous place at, or near, the work for which it was issued.

No person shall cause or allow the operation of any new emission source or new air pollution control equipment of a type for which an installation permit is required unless an application for a certificate of operation is secured. Application for certificates of operation shall be made at such times and contain such information, data, plans, drawings, calculations as specified in this application in the construction permit.

No Certificate of Operation shall be valid for more than one calendar year or until the next annual inspection.

The department shall have the owner or operator of any emission source or air pollution control equipment provide, without charge to the department, necessary holds in stacks or ducts and other safe and proper testing facilities, including scaffolding, but excluding instruments and sensing devices, as may be necessary.

17-2.35. Upon completion of any work for which an installation permit was issued, the department shall be notified by the person or persons responsible therefor, and, if upon inspection it is found that such work is in conformity with the plans and specifications, and it is found to operate within the provisions of Sections 17-2.3, 17-2.4 and 17-2.6, the commissioner shall issue a certificate of operation forthwith.

17-2.39. It shall be the duty of any person responsible for any discontinued or dismantled fuel-burning, *refuse-burning, compactor,* combustion or process equipment or device coming under the jurisdiction of the permits or fees of this chapter to report to the department within thirty days the permanent discontinuance or dismantlement of such equipment or device.

No person shall cause or allow the continued operation of an emission source or related air pollution control equipment if such operation would cause a violation of the standards or limitations as set forth in Chapter 17, and shall be reported, telephoned, or telegraphed at the time of occurrence. A request for permission to continue to operate during a malfunction or breakdown, a full and detailed explanation of why such continued operation is necessary, the anticipated nature sources and quantities of emissions which will occur during such continued operation, the anticipated length of time during which such operations will continue and complete records and reports shall be maintained and submitted to the commissioner.

No person shall cause or allow the start-up of any emission source or related air pollution equipment without first filing a notice of start-up with the Commissioner of Environmental Control.

17-2.40. An annual inspection shall be made by the department of all fuel-burning, *refuse-burning, compactor,* combustion or process equipment or devices, coming under the provisions of this chapter, whether or not a certificate of operation or allowable fuel certificate allowing use of such equipment or process has been previously issued by the commissioner, to see that such equipment or process can be so managed and operated that no smoke, particulate, or other matter shall be emitted therefrom in violation of any emission limitation or other requirement provided under this chapter; provided, however, that no annual inspection shall be required of locomotives, ships, boats, tugs, internal combustion engines, domestic heating plants, [, or domestic refuse-burning equipment]; and provided, also, that where any fuel-burning, *refuse burning, compactor,* combustion or process equipment or device has been installed, erected, constructed, reconstructed, altered, added to, or repaired pursuant to a permit issued under Section 17-2.32, has been inspected in accordance with the requirements of Section 17-2.35 hereof, and has been in operation less than six months, an annual inspection will not be required until six months from the date such equipment was first put under fire after the completion of such work.

[The fees for each annual inspection, as hereinafter provided, shall include the issuance of a certificate of operation.]

Each annual certificate of operation shall be effective from the date thereof for a period of one year or until the next annual inspection.

17-2.41. Upon a finding that any fuel-burning, *refuse-burning, compactor,* combustion or process equipment or device inspected, on any original, annual or subsequent inspection has been found to comply with the provisions of this chapter, and after payment of the prescribed fee, the commissioner shall issue a certificate of operation which shall be posted in a conspicuous place. [at or near the equipment or process. Any certificate of operation may contain such information and certifications as are contained in allowable fuel certifications as are contained in allowable fuel certificates pursuant to Section 17-2.22.]

[, and such unpaid debt shall be recoverable in any court of competent jurisdiction. If any such emission is shown by such test or tests to be within the limits of emission prescribed in this chapter, the cost of such test or tests shall be charged to the annual appropriation of the department.] *In all such cases the costs of the tests shall be an unpaid debt and shall be recoverable in any court of competent jurisdiction.*

In the event that the rendering processes of more than one company are contributing to the objectionable odor nuisance, abatement shall be deemed effective when the odor concentration from each process is not more than 25 odor units/cubic foot as determined by Mills adaptation of ASTM D-1391-57.

An objectionable odor nuisance exists when a trained inspector, upon the receipt of a complaint from one resident or property owner in the area affected shall determine that these odors cause a nuisance as outlined as follows:

Objectionable Odor Nuisance Determination: An objectionable odor nuisance exists:

On or adjacent to residential, recreational, institutional, retail sales, hotel or educational premises when odor is detectable in the ambient air after it is diluted with eight volumes of odor-free air as measured by the Scentometer;

On or adjacent to industrial premises when odor is detectable in the ambient air after it is diluted with twenty-four volumes of odor-free air as measured by the Scentometer;

On or adjacent to premises other than those above when odor is detectable in the ambient air after it is diluted with sixteen volumes of odor-free air as measured by the Scentometer;

When concurrent determinations made by three trained inspectors as outlined above in any given one hour period and at intervals of not less than fifteen minutes result in two positive determinations in each series of three determinations; and

Provided that any quantitative odor level measurement taken to arrive at a determination that an objectionable odor nuisance exists shall be at or beyond the property line or at or near places where people live or work.

Section 4. Chapter 17 of the Municipal Code of Chicago is hereby amended by adding thereto new Sections 17-2.67, 17-2.68 and 17-2.69 as follows:

Honorable Anthony C. Laurino
Chairman, Committee on License

Dear Mr. Chairman: On February 24, 1972, eleven Aldermen introduced an ordinance amending the Municipal Code of the City of Chicago to license and regulate the sale of second-hand motor vehicles in the City of Chicago. Although more than two years have elapsed since the introduction of this ordinance no hearings have been held thereon.

As you must know, the investigation of used car dealers in the City of Chicago is long overdue. Recently much attention was given this problem by various segments of the news media. Concern for the quality of our air and the problems of excessive toxic emissions from many of those used cars should impel prompt action in this matter.

Accordingly, pursuant to Rule 41 of the Rules of Order of the City Council of the City of Chicago, request is made to you for a report on such proceedings had on this ordinance before the Committee on License.
